## Web Waiter Online Food Ordering System

They Click - You Profit!

## With WebWaiter Online Ordering... Your Capacity is Limitless!

- Eliminate ordering bottleneck
- Reduce in-store cash-out
- Lower labor cost
- Increase total meals sold
- Increase lunch rush profits by 20%

### Here's How it Works...

#### Click

Customers order from your online menu

Customers go to your online menu, complete their order and pay, -all online before coming to your restaurant.

#### Print

Orders print directly to your POS printer

WebWaiter tells your kitchen staff when to start the order, so you can serve it hot, -right when the customer comes in!

This will reduce your guesswork at how many people will show up for your lunch rush.

The order then prints out, directly from the customer's computer to your POS printer in your kitchen, or at the counter.

#### Cook

Cook to order, just in time for customer arrival

#### Eat!

Customer enjoys food with no waiting!

Your customer can enjoy a fresh meal, with no lines, no hassles!

Traffic dramatically increases as time spent taking orders and cashing out customers is eliminated.

More orders in your day. More cash into your restaurant!
